

Length and carrots

Children will compare items at school using the language of length such as short, longer, longest, widest. They will also order items by placing them along a line.

Cut out these carrots and order them from shortest to longest along the red line on page 2.

Length and carrots

Order the carrots from shortest to longest. Place the top of the carrot on the dotted red line.

shortest carrot

Five green carrot silhouettes are arranged horizontally on a red dotted line. From left to right, their lengths increase. The first is the shortest, and the fifth is the longest.

longest carrot
